APEX *i* DROPe

BILL ACCEPTOR FOR THE GAMING TABLE

The brand new iDROPe adds a great new service for drop management at gaming tables. It combines security, speed and flexibility. Notes and tickets can be entered in a bulk of up to 30 at a time. The iDROPe does the rest automatically – securely validating and storing each individual note or ticket. Speed is the essence – see for yourself how quickly the iDROPe functions. An integrated ticket printer completes the iDROPe. Furthermore, players can now bring tickets to the tables in exchange for jetons. The iDROPe even allows players to choose the amount to have in jetons – the remainder is paid out by ticket.
